Victor Apaez | Software Engineer

Software Engineer with experience in Management. Eager to bring forward innovative and creative solutions to improve the way we interact with technology. Proven to be a leader, team player, and reliable worker with three years experience as a manager for an E-commerce.

SKILLS

- **Languages:** JavaScript, HTML, CSS, Python, SQL, noSQL
- **Databases:** PostgreSQL, MongoDB, | **Other:** RESTful Routing, JSON API
- **Libraries/Frameworks:** React, Express.js, Node.js

SOFTWARE DEVELOPMENT PROJECTS

League of Legends | FE - Github | BE - Github | Live Demo   *Nov 2022 – Present*

With over 117 million monthly users on League of Legends, this web application helps gamers search and build teams with their favorite characters and items.

- Managed a team of 5 developers to create a web application with MERN stack (MongoDb, Express.js, React.js, and Node.js).
- Directed team standup meetings to check on progress and plan code direction.
- Built out full CRUD (create, read, update, delete) operations hitting all RESTful API calls.
- Tested API routes using Postman to ensure functionality during production.
- Implemented user authentication using json web token and bcrypt on the server.

Breddit| FE - Github | BE - Github | Chat BE - Github | Live Demo   *Dec 2022 – Present*

Inspired by Reddit, this web application is a network of communities where people can share their interests and ideas.

- Collaborated with a team of 10 developers to create Better Reddit using React.js, Django, and Express.js.
- Delegated features to team members and assisted with debugging.
- Achieved a viable product with over 450 commits in 5 days using feature branch workflow.
- Designed a chat server to establish a WebSocket connection using socket.io.
- Applied socket.io on the client side using React.js to send messages between users.

Trailers App | Github | Live Demo   *Oct 2022 – Present*

A Netflix replica, this web application has trailers for top rated, now playing, and current entertainment.

- Engineered a web application for watching trailers using React.js, Styled-components and CSS3 flexbox layout.
- Implemented The Movie DB API to fetch live film and tv series data.
- Utilized IFrame Player API to display video trailers using keys fetched by the The Movie DB API.

PROFESSIONAL EXPERIENCE

Software Engineer Fellow | General Assembly | New york, NY   *Sept 2022 – Dec 2022*

- Over 400 hours of professional training over 12 weeks. Utilizes hands-on approach to design and build web applications with full CRUD functionality through Javascript, React, Express, MongoDB, HTML, CSS, etc.

Manager | Rubber Stamp Creation | Brooklyn, NY   *Nov 2019 – Aug 2022*

- Researched, hired, and trained new company employees according to the needs of the department.
- Delegate responsibilities to the best-qualified employees and enforce all policies, procedures, standards, specifications, guidelines, training, and cultural values.
- Overlooked day-to-day operations, assigned performance goals and ensure their completion.

EDUCATION

General Assembly, *Software Engineering Immersive* | New York, NY   *Sept 2022 – Dec 2022*
New York City College of Technology - A.S. Computer Science: Completed 70 credits.   *Fall 2014 – Spring 2017*
